pellentesque ante. Phasellus adipiscing semper elit. Proin fermentum massa ac quam. Sed diam turpis, molestie vitae, placerat a, molestie nec, leo. Maecenas lacinia. Nam ipsum ligula, eleifend at, accumsan nec, suscipit a, ipsum. Morbi blandit ligula feugiat magna. Nunc eleifend consequat lorem. Sed lacinia nulla vitae enim. Pellentesque tincidunt purus vel magna. Integer non enim. Praesent euismod nunc eu purus. Donec bibendum quam in tellus. Nullam cursus pulvinar lectus. Do

The remainder of the paper starts with a presentation of related work (Sect. 2). It is followed by a presentation of hints on LATEX (Sect. 3). Finally, a conclusion is drawn and outlook on future work is made (Sect. 4).

## 2 Related Work

Winery [2] is a graphical modeling tool. The whole idea of TOSCA is explained by Binz et al. [1].

## 3 LaTeX Hints

This section contains hints on writing LaTeX. It focuses on minimal examples, which can be directly adapted to the content

# 3.1 Handling of paragraphs

One sentence per line. This rule is important for the usage of version control systems. A new line is generated with a blank line. As you would do in Word: New paragraphs are generated by pressing enter. In LaTeX, this does not lead to a new paragraph as LaTeX joins subsequent lines. In case you want a new paragraph, just press enter twice (!). This leads to an empty line. In word, there is the functionality to press shift and enter. This leads to a hard line break. The text starts at the beginning of a new line. In LaTeX, you can do that by using two backslashes (\\).

This is rarely used.

Please do *not* use two backslashes for new paragraphs. For instance, this sentence belongs to the same paragraph, whereas the last one started a new one. A long motivation for that is provided at http://loopspace.mathforge.org/HowDidIDoThat/TeX/VCS/#section.3.

Paper Title

```
Corresponding LATEX code of paper-minted.tex
_{\rm 426} One sentence per line.
427 This rule is important for the usage of version control
   \hookrightarrow systems.
428 A new line is generated with a blank line.
429 As you would do in Word:
^{430} New paragraphs are generated by pressing enter.
431 In LaTeX, this does not lead to a new paragraph as LaTeX
    \hookrightarrow joins subsequent lines.
432 In case you want a new paragraph, just press enter twice (!).
433 This leads to an empty line.

    \hookrightarrow paragraphs.
441 For instance, this sentence belongs to the same paragraph,
   \hookrightarrow whereas the last one started a new one.
^{442} A long motivation for that is provided at
```

# 3.2 Notes separated from the text

The package mindflow enables writing down notes and annotations in a way so that they are separated from the main text.

This is a small note.

## 3.3 Hyphenation

IATEX automatically hyphenates words. When using microtype, there should be less hypnetations than in other settings. It might be necessary to tweak the hyphenations nevertheless. Here are some hints:

In case you write "application-specific", then the word will only be hyphenated at the dash. You can also write applicalallowbreak{}tion-specific (result: application-specific), but this is much more effort.

You can now write words containing hyphens which are hyphenated at other places in the word. For instance, application"=specific gets application"=specific. This is enabled by an additional configuration of the babel package.

```
Corresponding IATEX code of paper-minted.tex

463 In case you write \enquote{application-specific}, then the

$\to$ word will only be hyphenated at the dash.

464 You can also write \verblapplica\allowbreak{}tion-specific1

$\to$ (result: applica\allowbreak{}tion-specific), but this is

$\to$ much more effort.

465

466 You can now write words containing hyphens which are

$\to$ hyphenated at other places in the word.

467 For instance, \verblapplication"=specific1 gets

$\to$ application"=specific.

468 This is enabled by an additional configuration of the babel

$\to$ package.
```

# 3.4 Typesetting Units

Numbers can written plain text (such as 100), by using the siunitx package like that:  $100 \frac{\text{km}}{\text{h}}$ , or by using plain LaTeX (and math mode):  $100 \frac{\text{km}}{h}$ .

```
Corresponding LATEX code of paper-minted.tex

474 Numbers can written plain text (such as 100), by using the

3 siunitx package like that:

475 \SI{100}{\km\per\hour},

476 or by using plain \LaTeX{} (and math mode):

477 $100 \frac{\mathit{km}}{h}$.
```

5% of  $10 \,\mathrm{kg}$ 

```
Corresponding LATEX code of paper-minted.tex

481 \SI{5}{\percent} of \SI{10}{kg}
```

Numbers are automatically grouped: 123456.

```
Corresponding LATEX code of paper-minted.tex

485 Numbers are automatically grouped: \num{123456}.
```

# 3.5 Surrounding Text by Quotes

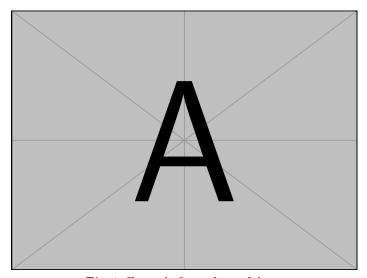

Please use the "enquote command" to quote something. Quoting with "quote" or "quote" also works.

```
Corresponding LATEX code of paper-minted.tex

491 Please use the \enquote{enquote command} to quote something.
492 Quoting with "`quote"' or ``quote'' also works.
493
```

# 3.6 Cleveref examples

Cleveref demonstration: Cref at beginning of sentence, cref in all other cases.

 $\bf Fig.\,1:$  Example figure for cref demo

Heading1 Heading2		
One	Two	
Thee	Four	

Table 1: Example table for cref demo

Figure 1 shows a simple fact, although Fig. 1 could also show something else.

## 6 Firstname Lastname and Firstname Lastname

Table 1 shows a simple fact, although Table 1 could also show something else. Section 3.6 shows a simple fact, although Sect. 3.6 could also show something else.

```
Corresponding LATEX code of paper-minted.tex

523 \Cref{fig:ex:cref} shows a simple fact, although

\( \sim \cref{fig:ex:cref} \) could also show something else.

524

525 \Cref{tab:ex:cref} shows a simple fact, although

\( \sim \cref{tab:ex:cref} \) could also show something else.

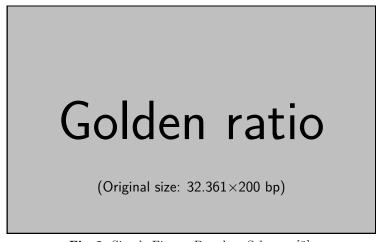

526

527 \Cref{sec:ex:cref} shows a simple fact, although

\( \sim \cref{sec:ex:cref} \) could also show something else.
```

# 3.7 Figures

Figure 2 shows something interesting.

 $\textbf{Fig. 2:} \ \text{Simple Figure. Based on Scharrer } [3].$ 

#### 

One can also have pictures floating inside text:

\end{figure}

540

8

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place.  $\sin^2(\alpha) + \cos^2(\beta) = 1$ . If you read this text, you will get no information  $E = mc^2$ . Really? Is there no information? Is there a difference between this text and some nonsense like "Huardest gefburn"? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look.

Fig. 3: A floating figure

 $\sqrt[n]{a} \cdot \sqrt[n]{b} = \sqrt[n]{ab}$ . This text should contain all letters of the alphabet and it should be written in of the original language.  $\frac{\sqrt[n]{a}}{\sqrt[n]{b}} = \sqrt[n]{\frac{a}{b}}$ . There is no need for special content, but the length of words should match the language.  $a\sqrt[n]{b} = \sqrt[n]{a^nb}$ . Hello, here is some text without a meaning.  $d\Omega = \sin\vartheta d\vartheta d\varphi$ . This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like "Huardest gefburn"? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look.  $\sin^2(\alpha) + \cos^2(\beta) = 1$ . This text should contain all letters of the alphabet and it should be written in of the original language  $E = mc^2$ . There is no need for special content, but the length of words should match the language.  $\sqrt[n]{a} \cdot \sqrt[n]{b} = \sqrt[n]{ab}$ .

603 \end{center}
604 \end{table}
```

#### 3.10 Source Code

minted is a sophisticated packes to enable properly highlighted listings. It uses the pygments library, which in turn requires Python.

Listing 1 shows source code written in XML. line 2 contains a comment.

```
1 1 1 sting name="example">
2      <!-- comment -->
3      <content>not interesting</content>
4 </listing>
```

List. 1: Example XML listing using minted

```
Corresponding \LaTeX code of paper-minted.tex
   \Cref{lst:XML} shows source code written in XML.
   \refline{line:comment} contains a comment.
615
616
   \begin{listing}[htbp]
617
        \begin{minted}[linenos=true,escapeinside=||]{xml}
618
619 clisting name="example">
     <!-- comment --> |\labelline{line:comment}|
620
      <content>not interesting</content>
621
622 </listing>
623 \end{minted}
      \caption{Example XML listing using minted}
      \label{lst:XML}
626 \end{listing}
```

One can also typeset JSON as shown in Listing 2.

 ${\bf List.}$  2: Example JSON listing using minted

#### 

Java is also possible as shown in ??.

```
public class Hello {
public static void main (String[] args) {
System.out.println("Hello World!");
}
}
```

List. 3: Java code rendered using minted

# 3.11 Itemization

One can list items as follows:

- Item One
- Item Two

# Corresponding LATEX code of paper-minted.tex 664 \begin{itemize} 665 \item Item One 666 \item Item Two 667 \end{itemize}

One can enumerate items as follows:

- 1. Item One
- 2. Item Two

```
Corresponding LATEX code of paper-minted.tex

674 \begin{enumerate}
675 \item Item One
676 \item Item Two
677 \end{enumerate}
```

With paralist, one can even have all items typset after each other and have them clean in the tex document:

1. All these items... 2. ...appear in one line 3. This is enabled by the paralist package.

```
Corresponding LATEX code of paper-minted.tex

| 684 | \text{begin{inparaenum}} |
| 685 | \text{item All these items...} |
| 686 | \text{item ...appear in one line} |
| 687 | \text{item This is enabled by the paralist package.} |
| 688 | \end{inparaenum}
```

### 3.12 Other Features

The words "workflow" and "dwarflike" can be copied from the PDF and pasted to a text file.

```
Corresponding LATEX code of paper-minted.tex

694 The words \enquote{workflow} and \enquote{dwarflike} can be

copied from the PDF and pasted to a text file.
```

The symbol for powerset is now correct:  $\mathcal{P}$  and not a Weierstrass p  $(\wp)$ .  $\mathcal{P}(1,2,3)$ 

```
Corresponding LATEX code of paper-minted.tex

698 The symbol for powerset is now correct: $\powerset$ and not a

$\to$ Weierstrass p ($\wp$).

699

700 $\powerset({1,2,3})$
```

Brackets work as designed: <test> One can also input backquotes in verbatim text: `test`.

# 4 Conclusion and Outlook

Lorem ipsum dolor sit amet, consectetuer adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris.
